

DRYERS

AquaDri®

High Performance Drying

Efficient design — consistent results

FREESTANDING DRYERS

AquaDri FS-Series dryers are designed to thoroughly shed water from the vehicle after washing. Producer positions are adjustable to obtain the best nozzle angles toward the car for the ultimate dry.

Available in 30/40/50/60 HP configurations to match your needs.

ON-BOARD STATIC DRYERS

AquaDri E-Series dryers are designed to move back and forth over a stationary vehicle while each nozzle automatically adjusts to the direction of travel to push water off the top and down the sides.

Available in 30/40 HP configurations to match your needs.

ON-BOARD CONTOURING DRYER

Exclusively designed for Mark VII rollovers, the AquaDri C-15 contouring dryer is integrated into the gantry. Two 7.5HP motors produce high velocity air (over 140 mph at the nozzle) through an array of nozzles that distribute the air across the car.

DRYER SOUND LEVELS

AquaDri®	Entrance End					Exit End				
	dBA @ 10'	dBA @ 20'	dBA @ 30'	dBA @ 40'	dBA @ 50'	dBA @ 10'	dBA @ 20'	dBA @ 30'	dBA @ 40'	dBA @ 50'
